

WHO ARE WE?

Able-Energy is an organisation whose client's desires and prospects drives how we selectively approach each of their critical energy needs to ensure deep costs savings and optimised operational efficiencies for their building portfolios.

We seek to provide exceptional energy-efficiency and facility-improvement services in a professional, people-oriented and cost-effective manner, with an emphasis on integrity and excellence.

We are committed to helping our clients turn their facilities into places that are more cost-efficient, environmentally responsible places to do business.

At Able -Energy each project no matter the size is valued. We apply all the necessary expertise and resources to produce an end result of the highest quality.

Last but not least, we specialize in developing energy efficient projects that are paid for by guaranteed savings from your utility and operations budgets. This results in budget-neutral or revenue-positive projects for our clients that enable them to make critical facility and operational improvements today.

WHY WE ARE HERE....

We are here to ensure that our clients;

- ✓ Improve the experience of their buildings occupants;
- ✓ Facilities adapt to occupants needs for comfort, etc.;
- ✓ Utilities are well structured to ensure optimised energy use and costs;
- ✓ Facilities improve market differentiation amongst its peers;
- ✓ Realise financial savings from their facilities utilities operational costs;
- ✓ Grow asset values as per desired forecasts; and
- ✓ Facilities maintain optimum energy performance.

Ultimately we are here because of our passion to drive utilities, energy and operational efficiencies in industrial and commercial facilities to increase the bottom-line.
